

SHIVANG RAI

Full-Stack Developer · AI Automation & Data Science

[Gmail](#) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | +91 7905192935 | Lucknow, India

SUMMARY

Full-Stack Developer with hands-on experience building scalable web applications, AI multi-agent orchestration, and production backend systems. Proficient in React.js, .NET MVC, C#, SQL Server, Node.js, and Python. Adept at full-stack architecture, REST API engineering, real-time systems, and delivering robust software solutions.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Information TechnologyExpected: May 2027

Babu Banarasi Das University

Relevant Coursework : Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

TECHNICAL SKILLS

Frontend:	React.js, Next.js, Redux Toolkit, TypeScript, JavaScript (ES6+), Tailwind CSS, Vite, HTML5/CSS3
Backend:	C#, .NET MVC, ASP.NET Core, Node.js, Express.js, Python, FastAPI, RESTful APIs, Web-Sockets
AI & Automation:	Multi-Agent AI Pipelines, Gemini API, MCP (Model Context Protocol), Pydantic Schemas, SSE
Databases & Data:	SQL Server, PostgreSQL, MongoDB, MySQL, Redis, Firebase Firestore, Pandas, NumPy
DevOps & Tools:	Git/GitHub, Docker, GitHub Actions, AWS (EC2, S3), Nginx, Firebase, Vercel, Render
Languages:	C#, JavaScript, TypeScript, Python, Java, C++, SQL

EXPERIENCE

Software Developer Intern (React & .NET) — Scurry Infotech LLPAug 2026 – Present

Frontend Development : Built and maintained responsive, cross-browser web interfaces using React.js, JavaScript, HTML, and CSS, managing client-side application routes for smooth navigation.

.NET MVC & REST APIs : Developed and modified application features in .NET MVC (C#), engineering REST APIs and backend request routing for seamless frontend-backend communication.

Database & SQL Server : Managed database operations with SQL Server, executing queries and optimizing data retrieval for core business modules.

Debugging & Git Collaboration : Diagnosed and resolved end-to-end frontend and backend issues to boost system stability, using Git for version control within an agile team environment.

PROJECTS

APTICO — CAREER PROGRESS & GAMIFICATION PLATFORMReact.js, FastAPI, Gemini API, Pydantic, Redis

Multi-Agent AI Pipeline : Architected a 3-agent orchestration system (Auditor, Strategist, Copywriter) via Gemini API with Pydantic validation, eliminating untyped JSON output failures.

Real-Time Streaming : Implemented Server-Sent Events (SSE) for zero-polling live feedback on React UI, integrating Redis-cached XP progression and leaderboard rankings.

REAL-TIME CHAT & CALLING APPLICATIONReact.js, Firebase Firestore, WebRTC, Tailwind CSS

Real-Time Messaging: Engineered messaging platform with Firebase Firestore snapshot listeners, supporting 1-on-1/group chats, typing indicators, and presence tracking with sub-second latency.

- **P2P Audio/Video** : Integrated WebRTC mesh architecture for direct peer-to-peer encrypted voice and video calls with automated client-side media compression.

TRAFFIC INTELLIGENCE & ANALYTICS SYSTEM

Python, FastAPI, React.js, Pandas, Leaflet

- **Data Pipeline** : Processed 50k+ road transport records using Pandas & NumPy to analyze accident clusters, casualty severity, and peak congestion trends.
- **Geospatial Dashboard** : Created interactive heatmaps using Leaflet and React, powered by asynchronous FastAPI endpoints for rapid data filtering.

THE ROASTING HOUSE — E-COMMERCE PLATFORM

Next.js, TypeScript, Node.js, PostgreSQL, AWS S3

- **Auth & Storefront** : Built an e-commerce platform with JWT authentication, role-based access control (Admin/Customer), persistent cart state, and order lifecycle workflows.
- **Cloud Storage & CI/CD** : Integrated AWS S3 for product media uploads and configured automated GitHub Actions CI/CD workflows for continuous deployment.
