

SHIVANG RAI

Full-Stack Developer · AI Automation & Data Science

raishivang69@gmail.com | GitHub | LinkedIn | Portfolio | +91 7905192935 | Lucknow, India

SUMMARY

Full-Stack Developer specializing in AI-integrated systems, with hands-on experience building scalable web applications, multi-agent AI pipelines, and cloud-deployed backend services. Proficient across modern frontend, backend, and database technologies, with hands-on experience in both JavaScript (Node.js/Express) and Python (Django/FastAPI) ecosystems, along with REST API design, authentication systems, real-time data streaming (WebSockets/SSE), and cloud infrastructure (AWS, GCP). Seeking a Software Engineering Internship to contribute this experience to production-scale engineering problems.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Information Technology

Expected: May 2027

Babu Banarasi Das University

Relevant Coursework : Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

TECHNICAL SKILLS

Frontend:	React.js, Next.js, Redux Toolkit, TypeScript, JavaScript (ES6+), Tailwind CSS, Vite, HTML5/CSS3
Backend:	C#, .NET MVC, ASP.NET Core, Node.js, Express.js, Python, FastAPI, RESTful APIs, WebSockets
AI & Automation:	Multi-Agent AI Pipelines, Gemini API, MCP (Model Context Protocol), Pydantic Schemas, SSE
Databases & Data:	SQL Server, PostgreSQL, MongoDB, MySQL, Redis, Firebase Firestore, Pandas, NumPy
DevOps & Tools:	Git/GitHub, Docker, GitHub Actions, AWS (EC2, S3), Nginx, Firebase, Vercel, Render
Languages:	C#, JavaScript, TypeScript, Python, Java, C++, SQL

EXPERIENCE

Software Developer Intern (React & .NET) — Scurry Infotech LLP

Aug 2026 – Present

- Frontend Development :** Translated 15+ complex Figma mockups into fully responsive React components, ensuring strict cross-browser compatibility and improving client-side routing.
- .NET MVC & REST APIs :** Configured working Docker environments for the frontend architecture, streamlining local development and reducing onboarding setup time by roughly 40%.
- Database & SQL Server :** Engineered and maintained 10+ REST API endpoints in .NET MVC, successfully handling data routing for core business modules.
- Debugging & Git Collaboration :** Resolved 20+ critical bugs across the frontend and backend during agile sprints, significantly boosting system stability.

PROJECTS

APTICO — CAREER PROGRESS & GAMIFICATION PLATFORM

React.js, FastAPI, Gemini API, Pydantic, Redis

- Engineered a full-stack platform (Next.js, Fastify, PostgreSQL/Neon via Drizzle ORM) that transforms job-search activity into a gamified XP and achievement system, leveraging an event-driven architecture that decouples XP calculation from reward delivery.
- Integrated the Google Gemini API for AI-driven resume feedback and WebSockets for real-time multi-user progress synchronization; enforced Zod schema validation on the API layer and implemented TanStack Query on the frontend for type-safe, optimistic data fetching.

REAL-TIME CHAT & CALLING APPLICATION

React.js, Firebase Firestore, WebRTC, Tailwind CSS

- Real-Time Messaging:** Engineered messaging platform with Firebase Firestore snapshot listeners, supporting 1-on-1/group chats, typing indicators, and presence tracking with sub-second latency.
- P2P Audio/Video :** Integrated WebRTC mesh architecture for direct peer-to-peer encrypted voice and video calls with automated client-side media compression.

TRAFFIC INTELLIGENCE & ANALYTICS SYSTEM

Python, FastAPI, React.js, Pandas, Leaflet

- Data Pipeline :** Processed 50k+ road transport records using Pandas & NumPy to analyze accident clusters, casualty severity, and peak congestion trends.
- Geospatial Dashboard :** Created interactive heatmaps using Leaflet and React, powered by asynchronous FastAPI endpoints for rapid data filtering.

THE ROASTING HOUSE — E-COMMERCE PLATFORM

Next.js, TypeScript, Node.js, PostgreSQL, AWS S3

- Built a full-stack e-commerce platform (React, Node.js, Express, MongoDB) with JWT-based authentication (access/refresh tokens), OTP email verification, and a complete cart-to-checkout order flow.
- Implemented real-time order tracking using Socket.io for live status updates and an integrated Gemini API chatbot for customer support.
